EDUCATION

- Coderspace –**
Data Science & AI Summer School
Issued: 2025 E-Certificated
- Haliç University**
Computer Engineering-
Bachelor's Degree
2018 - 2022 GPA:2.60/4.00
- Mecidiyeköy Anadolu Lisesi**
2018 - 2021 GPA:85,97/100

LANGUAGES

- English B2-C1
- German A1

DETAILS

- AIESEC**
Volunteering member
- HARVARD-X**
CS50: Introduction to
Programming With Python

ABOUT ME

I'm a final-year Computer Engineering student who's always been curious about how things work— especially behind the screen. I don't just want to write code; I want to build things that matter. Whether I'm developing an API, designing a database, or figuring out how to make a system more intuitive, I believe technology is most powerful when it solves real problems, and that's the kind of engineer I aim to become.

EXPERIENCE

IT INTERN

Cumhuriyet Gazetesi- IT intern JUNE 2025-Present

- During my internship at the IT department of Cumhuriyet Newspaper, I supported tasks related to network configuration, system monitoring, and basic cybersecurity practices. I assisted in analyzing website structure and performance, configuring Cisco switches, and observing how enterprise-level networks function within a media organization.

FRONT-END DEVELOPER INTERN

Scramblebit Pazarlama Programlama- JULY 2024- SEPT 2024

- I completed front-end development internship at Scramblebit Company, where I worked on building and optimizing user interfaces using HTML, CSS, and JavaScript.

PROGRAMMING SKILLS

- Programming Languages:** C, C++, Python, Java
- Web Development:** HTML, CSS, JavaScript, FastAPI
- Object-Oriented Programming:** Java
- Algorithms & Data Structures:** Strong understanding using C++
- Database Systems:** SQL, SQLite – CRUD operations, schema design

Networking & Security

- Cisco Networking: Hands-on experience with switch/router configuration
- Infrastructure: IP addressing, subnetting, troubleshooting, diagnostics

Cybersecurity:

- System security, firewall configuration, vulnerability handling
- Experience with Sophos Firewall and secure network practices

Virtualization & Linux:

- VMware used for Linux-based network and system simulations
- Network Simulation: OMNeT++
- Tools & Technologies: Git, Visual Studio Code, Packet Tracer, VMware
